PROFESSIONAL SUMMARY

Agentic AI & Systems Engineer with 3+ years of professional experience across data systems and backend automation, specializing in production RAG pipelines, autonomous multi-agent state machines, and low-latency microservices. Adept at building LangGraph cyclic orchestration frameworks with prompt engineering guardrails, pgvector semantic search, and enterprise REST/SSE APIs with automated LLM evaluation harnesses (LangSmith, Langfuse, RAGAS). Graduate of BCA (77.4% First Division) and Minor in AI & Data Science from CCE, IIT Mandi (CGPA 8.44/10).

EDUCATION & CERTIFICATIONS

Minor in Data Science and Artificial Intelligence, Indian Institute of Technology (IIT), Mandi 05/2025 – 06/2026
Center for Continuing Education (CCE) CGPA: 8.44 / 10
Curriculum: Mathematical Foundations, Classical ML, Deep Learning (Transformers, Attention, CNNs, Optimization)

Bachelor of Computer Applications (BCA), Jaipur National University 06/2019 – 05/2022
Grade: 77.4% — First Division

PROFESSIONAL EXPERIENCE

The Bullseye, AI & Data Solutions Engineer 04/2024 – Present | Jaipur, India

- Architected automated Python and SQL ETL/ELT pipelines across 10+ B2B SaaS client accounts, aggregating cross-channel attribution and onboarding metrics into PostgreSQL with 99.5% pipeline reliability.
- Engineered multi-stage growth automation workflows using n8n, Zapier, and enterprise REST webhooks, automating LinkedIn lead capture, email sequencing pipelines, and bidirectional CRM synchronization.
- Developed LLM-driven reporting pipelines (FastAPI, Groq/OpenAI APIs) integrated with n8n to dynamically synthesize weekly client performance digests, cutting manual reporting turnaround by 65%.

Teleperformance, Technical Support Executive 06/2023 – 03/2024 | Jaipur, India

- Delivered enterprise technical support across 9.5-hour shifts handling software troubleshooting, client security SOPs (Norton / Microsoft), and system diagnostics under strict enterprise SLA targets.
- Utilized SQL queries and structured log analysis to diagnose system anomalies, verify database transactions, triage application errors, and escalate complex edge cases within enterprise escalation frameworks.

FEATURED TECHNICAL PROJECTS

CodexEngine, Document Intelligence & Production RAG | Python, LangGraph, FastAPI, Next.js, pgvector, LangSmith, RAGAS
Deployed a production document intelligence platform (codex-engine.vercel.app) on LangGraph state machines featuring multi-tenant pgvector search, streaming SSE responses, and 91% faithfulness on RAGAS golden regression testing.

commerce_cortex, Distributed Multi-Agent Transactional Orchestration Engine | Python, FastAPI, LangGraph, PostgreSQL, Docker Compose, Langfuse, OpenTelemetry
Engineered a containerized multi-agent commerce backend featuring LangGraph state routing, PostgreSQL transactional checkpoints (<40ms latency), Human-in-the-Loop approval gates, and distributed OpenTelemetry/Langfuse tracing.

Nimbus, Autonomous Developer Agent & Sandbox Control Plane | Python, FastAPI, LangGraph, Docker, WebSockets, GitHub API
Engineered a multi-tenant autonomous coding agent platform featuring a trusted control plane, disposable Docker/MicroVM sandbox workspaces (<1.5s spin-up), real-time WebSocket event streams, and short-lived GitHub App credential brokering.

AlgoDeck, Full-Stack Workstation & Sandboxed Execution Runner | Node.js, Express, PostgreSQL 16, Docker Compose, Monaco IDE
Built a full-stack developer learning workstation featuring a dual-pane VS Code Monaco IDE, isolated subprocess execution sandbox (5s kill timeout, 512KB buffer limit), PostgreSQL 16 connection pooling, and automated test harness.

TECHNICAL SKILLS

AI & Agentic Orchestration LangGraph, LangChain, Multi-Agent Systems, State Routing, Tool Calling, Structured Outputs, NeMo Guardrails, RAG, PyTorch	Cloud, LLMOps & Observability AWS (Bedrock, S3, EC2), Azure, GCP, LangSmith, Langfuse, RAGAS, OpenTelemetry	Languages & Systems Engineering Python, FastAPI, Linux, Docker, Rust, WebSockets, Server-Sent Events (SSE), SQL, TypeScript, Node.js	Databases & Data Pipelines PostgreSQL 16, pgvector, Redis, FAISS, Data Modeling, ETL/ELT Pipelines, n8n, Zapier
